CORE COMPETENCIES

White-Label EHR Platform (CareSync)

Cloud-hosted, modular EHR delivered as SaaS. Patient portal, provider portal, admin portal, scheduling engine, intake/exam builder, clinical documentation (SOAP), billing export, and payment gateway. Deployable under any organization's branding in 1-3 weeks.

E-Prescribing & Pharmacy Technology

Multi-network e-prescribing engine, certified for Electronic Prescribing of Controlled Substances (EPCS, Schedules II-V) with two-factor identity proofing. DirectTrust certificate holder for secure clinical messaging. Integrated national drug database, formulary builder, real-time pharmacy benefit transparency, and medication management tools.

Telehealth Platform Infrastructure

Turnkey virtual care technology stack: HIPAA-compliant synchronous video, asynchronous workflows, live-transfer intake routing, scheduling, and encounter management. API-first architecture for integration with existing agency systems.

Healthcare IT Systems & Integration

Real-time insurance eligibility and benefit verification APIs. Custom integrations for labs, pharmacies, and DME vendors. Role-based access control (8 user roles, 22 encounter statuses). Full audit trail, compliance reporting, and data export capabilities.

NAICS CODES

CODE	DESCRIPTION	SIZE STD
513210	Software Publishers (Primary)	\$38.5M
541512	Computer Systems Design Services	\$38.5M
541511	Custom Computer Programming	\$38.5M

TARGET AGENCIES

DEPT OF VETERANS AFFAIRS	HHS / HRSA	DOD / DHA
INDIAN HEALTH SERVICE	STATE & LOCAL HEALTH DEPTS	

DIFFERENTIATORS

- Veteran-founded and operated. CEO served as US Navy Surface Warfare Officer (2014-2019).
- Pure technology provider. NTH builds and licenses the platform. We do not manage providers or render clinical services.
- Purpose-built healthcare SaaS, not a generic tool adapted for healthcare.
- White-label deployment in 1-3 weeks under any organization's branding.
- EPCS certified for controlled substance e-prescribing, and a DirectTrust certificate holder for trusted health information exchange.
- Direct contractual relationships with national e-prescribing networks and licensed drug-database providers.
- Modular architecture: agencies license only the modules they need.
- Proven at scale: 1,000+ daily active users across multi-state operations.
- API-first design for seamless integration with existing agency IT systems.
- Compliant infrastructure: HIPAA, HITECH, Omnibus Rule aligned. Full audit trail.
